### **Chuck Stephenson Joins Sulfur Recovery Engineering**

**Sulfur Recovery Engineering Inc.** today announced that Chuck Stephenson has joined Sulfur Recovery Engineering Inc. (SRE) as US Regional Manager, effective immediately.

Chuck has joined SRE from Vapor Point LLC, where he was Business Development Manager. Chuck brings more than 30 years' technical sales experience in sulfur treatment within the Midstream and Downstream market segments to SRE to assist clients with solutions to operating problems, and control of costs associated with sulfur recovery units, amine systems, and sour water strippers.

Additionally, Chuck's experiences that will benefit SRE's clients moving forward include:

- US Regional Sales & Marketing – Sulphur Experts Inc.
- Plant testing and optimization Sulphur Experts Inc.
- Vice President Sales & Marketing Petro Analysis & Measurement

Chuck can be reached by email to [chuck@sulfurrecovery.com](mailto:chuck@sulfurrecovery.com) or by phone at 1-903-352-0015.

*"I have missed working in the industry the last couple of years with all my friends and contacts, it is great to be back in business with a winning team,"* says Chuck.

*"We are excited about Chuck Stephenson joining SRE's team. He impressed me with his technical knowledge and I look forward to working with him in expanding SRE's testing, training, and engineering consulting services for our US clients,"* says Inshan S. Mohammed, Principal Process Engineer at SRE.

**About SRE:** Sulfur Recovery Engineering Inc. (SRE) with branch offices in Alberta, Canada and Texas, USA, was founded in March of 1998 in Calgary, Alberta, Canada. SRE offers highly specialized services to the oil refining and gas processing industries to assist clients with the operation, optimization, and long-term management of their sulfur recovery and associated upstream process units.
